Indo US Collaboration for Engineering Education (IUCEE)

About World Global Summit 2021

As the education providers of the future, a detailed plan is required to be chalked out to identify and introduce the social innovation practices that aim to meet student's aspirations and global sustainability challenges. In this context, Chandigarh University is organizing one-of-its-kind 'World Global Summit' that will bring together prominent Chancellors, Presidents & Vice-Chancellors of International and National Universities to jointly deliberate upon drawing out a roadmap for New Age Universities on 'Social Innovation for Sustainable Development through Global Academic Partnerships'.

THE CHANGING PARADIGM OF HIGHER EDUCATION

The world of education has been ever changing and evolving. The unprecedented situation created by the global pandemic, COVID-19 has prompted higher education institutions to rethink yet again. Teaching pedagogies are being developed to include interactive and engaging experiences rather than simple dissemination of information.

It's important to state that the teaching methodologies of a new-age University should be globally relevant. A 21st century education is all about giving students the skills they need to succeed in this new world, and making them confident to practice those skills. Digital Technology and International engagement are fundamentals to a thorough 21st century education.

Moreover, modern higher education is expected to be an engine of social change and economic development. It consists of systematic instruction in 'universal' knowledge and skills, provided by specialists.

However, in the process of the changing paradigm of higher education, it is much essential to make sure that we don't lose out on our values and culture. At the same time, it is also quite significant to lay focus on Outcome based Education and Sustainability, as this will not only benefit the students to successfully implement what they learn, but also have measurable outcomes and set standards for observation.

Furthermore, there have been increasing expectations placed on universities to become agents of change, and to generate solutions to economic and social problems. Thus, Universities need to encourage social innovations and get engaged in community development activities for meeting sustainable development goals.

Chandigarh- the City Beautiful

Enwrapped by profound serenity and scenic beauty, Chandigarh – The City Beautiful stands as the most exemplary experiment in the contemporary history of planning and modern architecture. Wide boulevards connect all 56 sectors of the city, with each sector being a radical reimagining of urban life. One is intrigued by sculptures, crafts and taste of Indian culture which has been embodied in a much aesthetic fashion. From twisting concrete ramps around Sukhna Boating tower to the ever awake corridors of Elante Mall, Chandigarh stands apart as one-of-a-kind cities that is much like a culturally rich museum.

The City has emerged as a hub for the IT & Service Industry along with being an exceptional place to start business. Connected via road, rail and an International Airport, Chandigarh facilitates easy mobility of goods and services across the world.
